Technology Autodesk technology is the foundation for AutoCAD. Autodesk Architecture, AutoCAD Civil 3D and AutoCAD Electrical are based on the Windows programming language. AutoCAD Architecture also features a DYMES (Design Memory eXchange System) which is a method for DYMES (design geometry and analysis) that allows a user to determine how different assemblies or overlays would affect the architecture of a building. DXF (Drawing Interchange Format) is a file format created by Autodesk in 1992. The .DWG file format is an extension to the older DWG format which allows AutoCAD to store custom drawings (such as engineering and architectural plans, maps, and more) as well as include engineering, architectural, and construction information.
