An instruction for a computer keyboard says: The power key is oriented on the bottom of the keyboard. A friend mentioned that this is incorrect and should be: The power key is flipped on the bottom of the keyboard. Is that an acceptable usage of the word "flipped"? I've seen it used by business students, but the term makes me think of a child's learning to write the letters of the alphabet. A: While flipping is a perfectly understandable term, it is a language thing. It does not make sense to use a computer keyboard. If you are in a mechanical engineering environment, it is possible that flipping 1d6a3396d6
