~Q: Why allow a & in some characters but not in others? How does Java react to & instead of %: &\*foo\* %foo% I run % and get an error: Syntax error on token "foo", variable name expected after this token but & does not and the code is evaluated. A: & means the start of a Java string. In a Java string, some characters are special. This is called the "escape character" They're called escape characters because they cause the character to be taken literally, rather than the character it represents. A: & is a "String Escape" - it's meaning-as-a-character is unrelated to & as meaning "Start of string" or "%". Hence, "&foo%bar" is a valid, well-formed String, but "&foo&bar" is a syntax error, as the Java compiler will attempt to parse it as "the character '&', followed by the literal string 'foo', followed by the literal string '&', followed by the literal string 'bar', and terminated by a semicolon". A character that you're trying to use to start a new string, followed by one that you're trying to use to end a string, is a syntax error. Q:
