1.0 Introduction Photoshop Elements is a free program which Adobe markets to image professionals and amateurs who wish to get started with editing photographs and other 2D graphics. Adobe makes up a large percentage of the industry, and it is a pretty safe bet that most people who use Photoshop also use Photoshop Elements. Although Photoshop Elements 8 does not have most of the features of Photoshop such as layers, spot healing, adjustment layers, filters, masks, etc., it does let you go beyond simply resizing, cropping, or rotating an image. Elements makes it very easy to save photographs in a variety of formats so you can send them to friends via email, on the Web, or publish them to your website or blog. Adobe Photoshop Elements takes the hassle out of editing and enhancing photographs by letting you crop and resize them; cut, drag, and rotate them into position; and add special effects to make photographs look beautiful. Elements 8 includes powerful tools to help you with: • Image Adjustments • Embedding and rotating special effects • Crop and Resize Images • Enhance photos with Styles • Rotate, Flip, Resize and Cropping Images • Combine photos to make collages • Create custom shapes and cut them out of photos • Create beautiful vector graphics Whether you are a photographer or just an image enthusiast, Adobe Photoshop Elements can help you create an attractive photograph. A Journey Through Life Menu Loss and Gain is Life The title of my blog is Life One Day at a Time, but only one day at a time, not every one. Now we go back to school in the fall, which means more big changes. I know that I will feel different and a little lost, but there is a peace to this. I will have a new teacher, as well as school itself. Then there will be a new home with my husband who is now my college room mate and best friend. We are new parents to a dog, a cat and a guinea pig. These are all changes in our lives and our family. I will always love my family of three, but I will love them more if we are making changes together. One day at a time, I am preparing for all the changes we will be making together. I love my family and think of them every day. This summer I was able to take a week vacation with my family and some college friends. We swam, went to the beach, caught up with old friends, went fishing, and just relaxed and had a lot of fun. The downside was that I gained a few pounds, but it was the best vacation I had in years. I will go back to school now and we will begin a new routine. It's all good. "So we must embrace the impermanence in life and the beauty that it holds."-Diana Marker I still live day by day, and I must tell you that is better than dwelling on the past. Here is to happy days and good memories for you to look back on. The days of today are too short for all the wasted time you have wasted. Your life is only given to you once. Do not waste time. Time is money, but if you have money you have time. Live every day, love every minute. Be thankful for the time that you have been given on this earth. Work hard, but live well. Laugh often, for laughter is the best medicine. Open your heart and your mind and live in the here and now. Love the people you have in your life, and do not forsake them. Things of the past may be bad and painful, but maybe they can help to build your future. I am always on the lookout for life lessons. This summer was the first time I felt what it was like to be away from my family and
