carrier gives shoppers two days extra on orders of \$39 or more before regular shipping charges apply.  
Free Shipping from \$49! Limited-time offer. Order by 1/30/19 for standard orders at Amazon.com,  
7-11, Safeway, or No Frills. Offer ends 3/1/19. No minimums on sale items at Amazon.com (select  
from other eligible items), 7-11, or No Frills. Your fast, free shipping is free, for a limited time.  
Enjoy additional exclusives while supplies last. Shop now. Former Penn State wide receivers coach  
Jerry Sandusky's sentencing hearing was originally scheduled for Monday. But, after a nine-week trial  
in State College, Pennsylvania, jurors on Friday convicted Sandusky on 45 of 48 counts of child  
sexual abuse in the case. After the verdict was read, the hearing was rescheduled for Nov. 12 in  
Centre County, the venue in the former Penn State assistant football coach's sex-abuse case. The final  
sexual-assault count on which Sandusky was convicted — involving a boy in a separate incident —  
will be resolved by his sentencing. The former coach will be sentenced Oct. 24, after he has been  
evaluated at a probation department. Q: How do I access a class level variable? I understand that a  
class attribute is there to be used as the prototypical object and that a function attribute is used to  
function as an individual one. A class attribute is visible only to methods inside the class, while a  
function attribute

integrate React Router with Webpack? I want to make an app using React and Webpack. I started to  
make a default App.js with React router (react-router-dom in v4.0.0). When I add React router I see  
this: import React from "react"; import ReactDOM from "react-dom"; import { BrowserRouter }  
from "react-router-dom"; ReactDOM.render( , document.getElementById("root") ); And so on. The  
problem is I don't know what to write for my App.js. I just found that in the docs and React Router  
"suggests" to write this code (but I didn't): import React from "react"; import { render } from "react-  
dom"; import { HashRouter } from "react-router-dom"; import { Provider } from "react-redux";  
import { configureStore } from "../store"; import App from "../components/App"; import  
"../stylesheets/App.scss"; const store = configureStore(); render( , document.getElementById("root")  
); And I tried with this code but it says that Webpack can't find my App.scss. How should 3da54e8ca3
