TruePianos Cracked Accounts is a virtual instrument that enables you to easily play the piano in different types of environments. The interface of the program is highly intuitive, which means that everybody will be able to play the piano. There are two display modes that you can toggle between. The basic one displays the interactive image of a piano, while the advanced one presents you with a lot of options that can change the way the piano sounds, such as "Presets," "Reverb," "Velocity Control" and "Output Level". Moreover, on the lower side of the basic mode, you can see details about the rate at which your CPU is running, rate and latency. The sounds that the virtual instrument produces are very customizable. The program enables you to change the size of the room in which you are "playing", amount of reverb that the keys produce, velocity, A4 pitch, and keyboard dynamics. This will allow you to play in multiple ways, so that you can let your imagination roam free. There are also a number of presets that you can choose between such as "Delicate," "Performance," "Dense," "Standard," "Rock," "Wide," "Pop" and "Smooth". You should also know that all the settings that you have made to the program can be saved in a FXP file format, so that you can always have access to a specific type of sound.
