Autodesk Autocad automatically generates a new FileID (or a new file) with any new licence. The licence will be visible in the FileID if the licence was activated via a serial code. Send me the serial code Obtain the serial code by executing the registered command in the command line. 2> gconnect list {database} {fileid} 3> gconnect -d {database} {fileid} -c {fileid} The serial code will be the third parameter, the value that is the 7th parameter if there are no errors. Obtain the serial code by executing the registered command in the command line. Tutorials Generate an Autocad key Generate the serial code and the Activation ID. Obtain the Activation ID by executing the registered command in the command line. > Autocad generate ACAD.INI Obtain the serial code by executing the registered command in the command line. > Autocad generate ACAD.INI -s {serial code} If you have activated the serial code previously, you will obtain the Activation ID automatically. The serial code obtained is visible in the file ACAD.INI of your Autocad. In case the serial code was generated and the Activation ID was obtained previously, please use this Activation ID to activate the licence. Obtain the Activation ID by executing the registered command in the command line. > Autocad activate ACAD.INI -a {Activation ID} -e Activate the serial code by executing the registered command in the command line. > Autocad activate ACAD.INI -s {serial code} Activate the licence with the Activation ID. If the serial code was generated and the Activation ID was obtained previously, please use this Activation ID to activate the licence. If your licence has not been activated, please follow these steps: Add a file named ACAD.INI in the licence folder of Autocad. If you already have a file, you can use it and only you need to change its name to ACAD.INI Open the file ACAD.INI and change the lines corresponding to the serial code and the Activation ID to the serial code and Activation ID

What's New In AutoCAD?

Convert drawings to DWG or DXF formats in one click: Now, the new DWG Export format supports the popular AutoLISP system and enables you to combine your drawings with the editable source XML file. And with the new DXF Export format, you can also export DWG files as DXF files, which are now the de facto format for 2D CAD software. (video: 2:05 min.) Mark up: Keep the structure of your drawings while editing at the same time. Now, you can have both lines and text editable on the same drawing, with the ability to share and comment on edits with others. (video: 2:09 min.) Break free of your training program: Start a 2D drawing project by drawing out your first shape and annotate it in the plan view. The new feature speeds up creating the basic shape by giving you direct access to AutoCAD's pen tool. Add, edit, and delete annotations: Now, you can edit your annotations in the plan view. All annotations in the drawing are now editable and you can make them read-only, add color and styles, and convert them to shapes and text. (video: 1:50 min.) Go beyond simple editing: Include your annotations in your text directly. Just type your text, click in a corner of the annotation, and you can create your text on the fly from the annotation. Update your drawing and your viewer: With interactive annotation views, you can view and edit your annotations just as you would in a 3D viewer. (video: 3:08 min.) Geometric objects: Convert to 3D: Now, you can convert objects from any geometric type into 3D, regardless of the rest of the drawing. (video: 2:42 min.) Create new 3D objects in a snap: The new 3D tools in AutoCAD can now create and manipulate 3D objects at the same time. You can add or subtract objects, and you can quickly select and move new 3D objects with the plan view. (video: 1:42 min.) Interactive 3D drawing tools: Create 3D objects, all in one drawing: The new 3D tools give you the ability to use 3D CAD in any drawing environment. You can create 3D objects from existing geometric objects in any type of drawing,
