Utilities in the state reported an increase of nearly 9 percent in electricity bills last year. By Joanne GorvettDaily News Staff New Hampshire residents paid more for electricity in 2011 than they did in 2010, according to a study by New Hampshire-based EnerNOC, a provider of energy efficiency and distributed generation solutions. Utilities in the state reported an increase of nearly 9 percent in electricity bills last year. The study found a 2.6 percent increase in total electricity consumption and a 7.6 percent increase in retail prices in 2011. The research was based on average data for each utility in the state. Though the cost of electricity in Massachusetts also increased last year, New Hampshire's rates remained much higher than the national average. EnerNOC's Executive Vice President of Energy Efficiency Joseph Ferguson said. Ferguson said that the increase was not a reflection on the state's renewable energy portfolio standard, which has helped reduce carbon emissions. "We're continuing to see a positive impact on the climate," he said. "We're seeing a very positive impact on the industry." EnerNOC's analysis compared 2011 with 2010 levels and identified electricity consumption increases for the eight major utilities in the state. While the increase may seem slight, the countrywide rise in gas prices that year more than offset the steady rise in electricity bills. Hydro-Electric company NH Electric Cooperative was the only utility in the state that reported a decrease in 2011 electricity consumption. While the company's use of renewables decreased slightly, it did not reflect the planned reductions in electricity demand, according to the company's spokesperson, Paul C. Green. "The decrease in use in 2011 was largely driven by a decrease in the hydropower system, which was down by an average of about 2,000 kWh (kilowatt-hours)," he said. "Hydropower is usually the lowest cost energy." Green said that demand for electricity across the state

(video: 1:05 min.) On-screen Commands: Use the new Outliner to navigate your drawing and find objects quickly. The new Outliner updates automatically, so you'll always know which objects are active. The Outliner supports dynamic command inheritance, so you can set up custom commands that are automatically available to you as you work. (video: 1:14 min.) Use the FIND command to highlight objects, and then to interactively make copies, move or rotate them. Now you can more quickly draw, annotate and modify your objects. (video: 1:29 min.) Adjust the speed and clarity of your drawing output using the new Tracing settings. Just set your preferred settings once and your drawings will be traced automatically at a more appropriate speed. (video: 1:06 min.) Reduce the time and effort needed to edit the Outliner and other drawings using the new drawing settings and drawing macros. Now you can set common things like changing tool styles or renaming objects as you go, saving time and effort later. (video: 1:03 min.) User Interface Improvements: Share drawings and data with customers, colleagues, partners and colleagues using new Collaboration features. Automatic display of a scale bar and grid guides, for a more consistent look when sharing drawings. New dimension name conventions to make sharing faster. Automatic display of non-breaking spaces in text and dimensions. Dimension-based drawing settings. Dimensions in titles. Calc command improvements. New shaded mode for annotating drawings. And More: New interactive editing tools. You can now edit, redraw and even insert new text and dimension objects without a graphics tablet. (video: 1:32 min.)
