Autodesk, Inc. is an American corporation that was founded in 1968. Autodesk produces a variety of software products, including AutoCAD, AutoCAD LT, Inventor, MEP, and Design Review. Autodesk acquired the product rights of Trimble Navigation in 2008 for an undisclosed sum. History [edit] Autodesk was founded in 1968 by Gary Revill and Richard Haas. In 1970, Revill, Haas, and David Blaikie founded the Cambridge, Massachusetts-based Application Systems Inc., a distributor of CAD software for the personal computer market.[3] Applications Systems initially marketed a CAD system called Space Age Drafting for the Apple II computer. With the success of Apple's first portable computers, the Apple IIe and IIc, Applications Systems expanded its portfolio to include other computer-aided design software such as Touch Designer for the Apple IIc. One of the company's first products was Revizor. Revizor was one of the earliest applications that allowed CAD users to "talk" to one another through a mail-like network. In 1976, Applications Systems was bought out by the TI software group. The acquisition was controversial within the computing community, with many long-time users and industry observers complaining about the TI group's conservative approach to CAD software. Revill was outspoken on this issue, and left Applications Systems two years after the acquisition. Revill founded Cadssoft, a desktop CAD software company that he operated from 1977 to 1984. In 1982, Revill started the development of AutoCAD, which eventually became the company's flagship product. AutoCAD is designed to be a point-and-click, mouse-driven CAD application for the personal computer. Revill and his team developed it on a NeXT computer, after an investor told him to "think different". Revill's NeXT computer was largely a failure and died in 1994. In the interim, he and the other developers continued to work on the NeXT operating system, creating the NeXTSTEP. Revill is still credited as one of the authors of NeXTSTEP. Release history [edit] AutoCAD was released in December 1982 on the Macintosh. Autodesk Corporation licensed the app to Autodesk Software Inc., the former name of Autodesk, Inc. The first release was called "AutoCAD Release 1.0".[4] AutoCAD is available in several editions, including Starter Edition,
