Raster graphics AutoCAD supports raster images such as JPEG, BMP, GIF, TIFF, PNG, ICO, TGA and PCD. However, in order to import these formats into the drawing, AutoCAD requires third-party plugins, as no native support exists. 2D to 3D image conversion After the 2010 release of AutoCAD 2014, 2D to 3D image conversion is available. This allows users to convert 2D raster image files into 3D and send these files to 3D modeling applications such as Fusion360. This functionality was included in AutoCAD 2015 as part of the 2D to 3D Converter, which can be found in the Image menu. 2D and 3D drawing templates AutoCAD has long included drawing templates that allow for the creation of 2D and 3D drawings. These drawing templates have existed since version 2.5 and have been a key part of AutoCAD. In order to open a drawing template a user needs to select it from the template manager. Tk templates AutoCAD contains several Tk (Tkinter) drawing templates. Unlike
