Technical interoperability (with

AutoCAD and other tools such as data management systems) AutoCAD can be configured to use other applications such as Trimble Vectorworks CAD, Unigraphics CAD, Visual C++, and

AutoLISP or VBScript scripts. For example, the Autodesk Visual C++ DLL is licensed for integration with AutoCAD. AutoCAD can connect to other CAD software such as PTC Creo, PTC Creo

Parametric, Pro/ENGINEER, Autodesk Civil 3D and Delcam SolidWorks. AutoCAD can connect to other engineering applications such as SAP ERP, SAP Business One, ARES, Storm

Environmental, Skyline, SiteTek, etc. The technical interoperability of these applications is through the integration of the applications' own automation frameworks with

AutoCAD.
Infrastructure support
AutoCAD is installed on
all major operating
systems, including
Windows, macOS and
Linux. Since 2007,
AutoCAD is offered in
64-bit versions for

Windows Vista and later. AutoCAD LT runs on Windows XP and Windows Server 2003 SP1. AutoCAD for Macintosh runs on PowerPC and Intel Macs. In addition, there are versions of

AutoCAD for mobile devices, including iPad, Android and Windows Phone. Hardware support AutoCAD is available for almost every computer platform that CAD applications are

available on, including PC, tablet, and mobile devices. In 2011, AutoCAD 2014 released a new version of the software, and was the first version of AutoCAD to support 64-bit systems, in

addition to 32-bit. In 2016, AutoCAD 2018 released, and it was the first version to support 64-bit OS systems. It also introduced the 64-bit Compression API to allow faster data

transfer between the host and device, thus allowing more powerful use of these newer systems. History AutoCAD was first introduced in 1988 and was developed by an Autodesk team based

in San Rafael, California. The first version supported 2D drawing only. The 2D product grew rapidly, and was introduced to the manufacturing industry in 1991. In 1995, a major version

change was made to AutoCAD. The 2D product was renamed AutoCAD LT (for LT because the L in 2D stood for 2D). This version of AutoCAD introduced a new main ca3bfb1094
