The software component can be deployed as a stand-alone application. FAQ DOWNLOAD section. .Q: how do you identify if a javascript array contains a string using lenght as a condition? I have a constructor in which I have a javascript array of objects and I need to identify if the array contains a specific string. function Person(names) { this.firstName = names[0] this.lastName = names[1] this.fullName = names.length > 2?names[0] + ", " + names[1] + ", " + names[2] :names[0] + ", " + names[1]} If I do var a = [new]Person("chris")] console.log(a.includes("chris")) I get false, which is not what I need. So how do you identify if a javascript array contains a string using lenght as a condition? A: You can use indexOf() like so: function Person(names) { this.firstName =
