**A deep maze game, where you can choose your path. There are infinite paths you can choose, and you can repeat the maze to find them all. There is light and darkness in the maze and lights in the maze can be turned off. The game is a deep maze puzzle game, but you don't have to think to complete the paths. A maze with a path that will keep you exploring for a long time. Puzzles in the maze will make you think and you will want to explore every path. Good music and great style. You can find some pretty interesting ideas in the art. Nice tutorial and a good tutorial, too. You can get the hang of this game after the first hour. If you run into a problem, you can read through the readme file in the game. Also consider downloading the game's demo, which has the same features as the full version. Detailed Gameplay: The game is set in a maze of light and dark. You can choose to light the path with torches you find, or choose to go the darkness path. The lights in the maze can be turned off and you will have to navigate through the dark parts of the maze. Use the sound of your footfall to aid you in navigation. When you choose to go the darkness path, then the map may look different than it did when you are in the light path, but the path you were in will be exactly the same. You can also navigate back and forth between the light and dark paths and they will be joined together. You can have more torches than you need, so having one spare is a good idea. Good music and great theme. The score gives you a good feeling when you complete a path, and the sound of your footsteps can be an aide to navigation. Good tutorial and good explanations. You can learn the game fairly quickly, even if you are coming from a different game. You can have a death and restart the path. This is a good feature to get used to when you are starting out. The maze is a lot of fun and there is some great puzzle in the maze. You can complete the maze in different ways and if you are having a difficult time with a particular puzzle, then you can always walk to an easier path. The music is good. If you want to make a list of great tunes of the soundtrack, then do it! It's a c9d1549cdd**

**What's new in Eliza Original Soundtrack:**

**A Theme for Strangers In a Strange Land (click the cover to order) Welcome to the 21st century. The world is now so inter-connected that, literally, everyone is a 'stranger' and we're all pushing up daisies in an expanding universe. This has, possibly, opened up some new potential markets for fiction. We've discovered distant cousins and found out that our own grandparents could be out there somewhere so maybe all those space folks who populate the galaxy's far corners have got it right...our point being that we've discovered, populating the galaxy, aliens you never knew you had. That's the world within science fiction where the theory is proven true again and again. In Asteroid Belt Tales, you will have a chance to experience another aspect of this statement through the eyes of our strange new contacts. The Other Station, Golden Cove, the orbiting city of Kerkkonfir, that's all courtesy of our latest visitors! Are you ready for this change? The initial plans for this anthology were for four stories. However, being a wild and wooly place, things - you know the way things are - got changed in the ister of time. And finally, here we are! If you know me you will understand that I am very much into 'I love it when we,' but thank you for understanding. Anyway, if you do have the time to chat me up a bit, we could go deeper into these already-explored mini-planets. As for now, let's just take a look at what's gone in - and for those of you who managed to stick through the blurb and intro, you will find that 40+ stories from some of the best up-and-coming science fiction authors, I'm sure you will not be disappointed. I was born on Goldon, a small planet in the Asteroid Belt. Seven in a family of two boys, a father and a mother, that was about it. I became a journalist, wrote columns for ION radio and tried to make a living. We had eight years then the mother left. After that my life became mine - a wanderer, making my own history and adventures, living cheaply and healthy. There was no more need for day to day survival, no more need to put food on the table. I found the freedom I needed**
