The table has a field called QualifierId (int) There are multiple occurrences of 'Yes' in the QualifierId column If we have a new row that has 'No' in the field and there are occurrences of 'Yes' in the table, it needs to flag the new record.

So, it looks like this: +-----+ | ID | QualifierId | State |
+-----+ | 1 | 1 | Yes | | 2 | 2 | No | | 3 | 2 | Yes | | 4 | 3 | No |
+-----+ So, ID 3 and 4 should get flagged. Since they are new rows and there are already Yes in this table, they should be flagged as new records, which is what I was trying to accomplish with my code. //Current State values string[]
CurrentStateIDs = { "Yes 648931e174

..Q: Working with bits in logic I
tried to program a string manipulation function

for bits. I wrote the following code: -# We will

work with C#. using System; using
