Features Key:

- **ENGAGING ANIMATION:** HyperMotion Technology uses real-life motion capture and high-end physical simulations to provide a more immersive and physically-accurate sensation of playing football. Players' movements, in particular, are captured using the "Elite Player" full-motion capture suits, enabling players' actions and movements to appear fluid, sharp and responsive, and enabling animations to be further augmented with 3D models.
- **REALITY:** Dynamic physics define realistic interactions with the ball and realistic reactions to shots. Variation with player speed, ball speed, weather, and more ensure the game delivers a range of ever-changing challenges.
- **INNOVATION:** Adaptive AI is now perfectly balanced for a single Player Career mode game or a series of single and multiplayer matches. Players can take their skills to the next level, making the most of their position on the pitch and being rewarded for traits learned and showcased throughout their career.
- **DYNAMIC REALISM:** More dynamic environments are created using game assets from around the world, as well as custom environments and places of teams' derbies. Dynamic anticipation, through quick tactics and intelligent re-positioning of players are enabled so that players make the right decisions and make smart runs at the right time.

EA SPORTS FIFA™ is the leading videogame franchise that brings to life some of the sport's most iconic players, teams and stadia. FIFA 17 marked a new direction for EA SPORTS FIFA, with the introduction of the Control Precision System™, the industry's first physics-based control methodology. All-new Matchday, Pro-Soccer Life and Ultimate Team modes support this new gameplay, delivering

deeper, more connected and more fun-to-play experiences than ever before. How did EA SPORTS FIFA get that way? EA SPORTS FIFA is an epic journey into the heart of football that started over twenty-five years ago. With loyal fans worldwide, over eighty million players and more than 220,000 customizable players in Ultimate Team Mode, FIFA is an enduring experience with rich storytelling, drama and visual creativity. Can you explain the history? Where did it all begin? The roots of FIFA came from the early days of Electronic Arts as a small studio in Burnaby, Canada, in 1989, where the founders were inspired by a game called NBA Jam, where they could physically imitate players like Michael Jordan. EA's Sports Division was formed in 1990, and the company started making its first ever sports game, Hardcourt Tennis (1991), which introduced the first dribbling mechanic in a tennis game. The inspiration for this new mode would come from running through the court, spinning on the ball and performing head fakes. As we grew, EA Sports Sports Division began the sports game franchise that would forever be known as EA SPORTS FIFA. How did you go from being a tennis studio to FIFA? The first game that everybody remembers from EA SPORTS FIFA is not Hardcourt Tennis, but World Cup 96/97. We were still in the early stages of our FIFA evolution, but the concept was the same: players would run and

dribble through the world's best teams in the sport's biggest tournament. Dribbling was one of the first ideas that Mike Rabinowicz, one of the original developers at EA Sports, brought to the game. In the early days, EA Sports Sports Division was a small development studio with no more than ten people working on Sports titles. Mike was one of the first developers at EA Sports and one of the first to join EA Sports Sports Division, where he provided football expertise and began developing that aspect of the FIFA franchise. Eventually, the idea of dribbling led to new features such as the ball
