The Password Recovery Kit supports all. You can upgrade into. Download the Passware Kit.Q: How to Remove/hide item from from two categories using DataTrigger I created a DataTemplate which has a CheckBox with style 'CheckBoxStyle' and a ListBox with ItemsControl style 'ItemsControlStyle'. The ListBox ItemsSource is bound to a ObservableCollection of items. The ItemsControl Style has a DataTrigger which should change the Item Foreground color according to the IsChecked property of the CheckBox. Now I try to remove some items from the ItemsSource if a specified condition is met. So my first idea was to check if the checkbox.IsChecked is false before removing the item from the ItemsSource but the ItemsSource is not aware of the IsChecked property. Is there a way to make the ItemControl aware of the checkbox.IsChecked property?
