What is Radio Romania? Radio Romania is an application that blends the ability to choose from a great variety of radio stations from the place where you happen to be to a window into the culture of a country that most of us are inclined to look down upon. It's a quality app that will likely leave you wanting more. If the idea of getting to know Romania in a different light than the one you already knew from a historical, geological, political or just plain touristy perspective is appealing to you, then you will have all your bases covered by downloading this app. Why this got 4 stars One of the reasons it got a four star rating was because it was the kind of app that gave you a different perspective on another culture. Another big factor were the mentions and reviews we got, which were both up-to-date and extremely positive. The bottom line is that the developers are trying to cater to you, their customer. That's the idea. We liked this application because it had a goal. It had a reason

for being, and we discovered what it was. We got the chance of learning more about Romania, and we even experienced the culture of this beautiful country. All from within the phone. That's amazing. What we didn't like Like any app, it had some possible drawbacks. One was the interface. It could have been a little bit more polished, just as some people might have liked it. That's just a minor downside. This app doesn't have much content. You're likely not going to find anything new on your first visit to Romania, but it's almost inevitable to find more after a while. For as great as it might be, it does tend to repeat itself. It's when the first Romanian song comes on that you know that thing is true. We did find some online radio stations that were listed on their websites, but if you do happen to discover one, you will have to rely on them to update that information, because you won't be notified unless you visit the app directly. If you do need to, for any reason, visit a website, be sure to use the website's Radio Romania URL. This will ensure that the radio streaming will be interrupted, just as it should be. Finally, you'll need to be a little patient when coming across that first Romanian

song. The radio stations on the app are very sporadic. It's as if they don't have any real connection to the app. You won't be able to find that first Romanian aa67ecbc25

At the moment of this writing, the application was still being updated. In the process, updates would include new stations, public holidays, and additional languages. While the developer was focusing on adding more languages, it would be wise for the app to add the ability to add additional radio stations to it. Currently, only Spanish, Romanian, French, Bulgarian, Romanian, Italian, and Spanish are included. This is a start, yet there is always room for improvements. When will it be updated? The developer was eager to offer other additional languages. The longer the application remained in the review process, the more chances it had to add a few more languages. It probably never would have happened, but it's funny how things might turn out. When you have a taste of Romanian culture, you won't be able to go back. You will be stuck in that country, and you will appreciate what it means to belong to the same culture. Fortunately, you have an application to bring your culture home. Give it a try, because it will surely stimulate you into thinking about other

# countries and the people they represent. Radio Romania cost? You can get the application for free

from the application's web page. However, it's best to go for the full version. Some people have complained about the application's price, but it's after all what it takes to add more languages to it. It's no different with most of the music streaming apps. If you want to listen to Romanian or Transylvania music, then you can pay the full price, or at least something similar. If you don't feel like paying at the moment, just wait. Eventually, the app will be updated with other languages. What are some of the radio stations included in Radio Romania? The app itself is quite simple. You can listen to one station, or many. There is also the option of finding out the number of stations included, and you can control that by clicking on the speaker icon. You just have to be quick at clicking that. If you wish to provide feedback on the application, or what else you feel you could provide, feel free to do so. It's all about expressing your opinion and finding out if this app deserves a feature-laden version of its own. List of Radio Romania stations: Jazz music on New York Arab
