The Syncro and FireAlarm control panels include the following features: Built-In Speech Transmission Integration with Kentec's Loop Explorer Loop Explorer including modules and accessories Configuration software Management tool The loop module is the heart of the FireAlarm control system and automatically integrates the fire alarm system speech transmission functionality to the loop. The loop module is a traditional loop module (not automatically selfintegrating) and from the customer's point of view. This can be seen as an optional extra item for customers who do not have either the Syncro or FireAlarm control panels. Kentec Loop Explorer 3.0 (LE3) is Kentec's latest loop explorer which gives customers even more control and features. The Loop Explorer and modules are also available from Kentec's website. Optional accessories include: When the fire detector reaches an alarm condition the system will send an audible message along a pre-selected loop. It is possible to assign different monitor or delay modes in order to manage a site's fire alarm program efficiently and to satisfy the requirements of their particular business. In addition to standard audible alarm options the Loop Explorer 3

Kentec Loop Explorer
