For children, one of the most important online educational tools is distance learning through the World Wide Web, known as Web-based learning. According to the Education Department, in-depth and well-planned web-based learning can deliver more than the equivalent of textbooks and supplementary learning materials. It provides students the training to acquire higher-level skills, understand material, and practice problem-solving and critical thinking, all of which may be lacking when using a textbook or homework manual. One of the most useful web-based learning materials in distance education is atlantidex-14.com. This unique site offers videos, reference materials, and tests that can provide a virtual classroom and digital library for all online learners regardless of their academic level and geographical location. The site is a constantly expanding library of media-rich instructional materials designed specifically to equip the 21st century student with the knowledge, skills, and tools to reach their learning goals. The most popular Web-based learning materials are the interactive courseware and the interactive training content. Interactive courseware supplements online education and distance learning with actual hands-on experiences that engage the learner's senses. The most popular Web-based materials are comprised of interactive e-learning tools, digital games, and simulations. Examples of these Web-based learning materials include online slideshows, animations, video learning, virtual reality simulations, and virtual environments. Distance Learning and Web-Based Learning: It's a Win-Win Online education is growing rapidly as more students are turning to this form of distance learning and distance education in order to meet their academic requirements. Web-based learning plays a vital role in the overall distance-learning market. Online education involves the use of online tools and technologies such as web page learning, intranet learning, telecommunications and other educational content to be accessed remotely. Web-based learning is essentially the delivery of teaching materials in a distance learning mode, and students may view them at their personal locations, at their leisure. There are two approaches for distance education, tele

SCARROS.Functional role of cytosolic sulfhydryl groups of Saccharomyces cerevisiae oxytocinase. Oxytocinase (EC 3.1.3.11) activity has been found to be stabilized in the presence of GSH but inhibited in the presence of another thiol, dithiothreitol (DTT). The relevance of DTT-stability of this enzyme activity to the presence of thiol groups in its active site was investigated by an analysis of its sulfhydryl group dependency. The activity of oxytocinase was gradually inhibited with increasing GSH concentration. The enzyme activity was almost completely inhibited by 500 mM GSH. On the contrary, oxytocinase was not inhibited by 500 mM DTT, even though 500 mM GSH had completely inhibited enzyme activity. With 500 mM GSH, the dissociation constant (Kd) of oxytocinase for oxytocin was estimated to be 5.3 microM, whereas the activity of oxytocinase was considerably decreased by even 1.0 mM GSH. At pH 5.0, for oxytocinase activity, the enzyme activity was inhibited with increasing GSH concentration up to 1.0 mM, whereas it was not inhibited in the presence of DTT even at its highest concentration. An analysis of the oxytocinase activity at pH 5.0 with GSH or DTT suggested that the enzyme is stabilized by DTT through a unique mechanism which includes the presence of thiol groups in the active site. If the same mechanism applies to the other thiol-dependent enzymes, this property is characteristic of the catalytic site of these enzymes. Oxytocinase and other thiol-dependent enzymes are relatively stable in the presence of DTT
