SCK Founded in 1939, Atlas Copco is today a leading supplier of innovative solutions for the power and mechanical engineering market. The company is headquartered in Stockholm, Sweden, but has sales offices, service facilities and production plants around the world. Atlas Copco products and services improve quality of life and help people around the globe work more efficiently and safely. The company has about 44,000 employees, shareholders and business partners. PRESS RELEASE Bluegenics is Launched as Industry Leading Gene Matching Solution International Company Releases Testing Solution with Precision Matchmaking Capabilities WALTHAM, MA, June 23, 2018“Bluegenics, Inc., a developer of novel DNA matching solutions for precision gene matching, today announced the launch of its services. "Using our unique statistical matching technology, paired with the experience of our team of geneticists, we have created a testing solution to help people find their ancestral matches. By providing market-leading tools for matching, we are providing much-needed healthcare and other services that are essential to solving genetic health issues," said Simon K. Copper, CEO and founder of Bluegenics. Bluegenics' chief strength is its unmatched statistic matching algorithm which displays highly accurate results, regardless of the type of DNA test that is used. Bluegenics covers a diverse range of tests including those from 23andMe, Ancestry and AncestryDNA. In fact, it was the result of combining these three major tests that led to their finding of the gene order used by all humans. DNA testing kits for health applications have been growing at a steady clip for the past 15 years. Genome-wide association studies (GWAS) have helped to understand how our genetic make-up can impact many health concerns. Families with only one parent are also realizing the importance of a healthy family tree. They are able to find and learn about their heritage by searching for and matching their DNA with others. Bluegenics' solution has the precision, accuracy and unique statistic matching approach that customers have come to expect and expect more. Bluegenics' solution is currently available for purchase and customers can discover their matches and learn more about their DNA history using its website, www.bluegenics.com. About Bluegenics, Inc.: Bluegenics is a privately held, international DNA matching technology and services company. Its solution will provide accurate results, regardless of DNA test type. Its team
