■ **Conflict:** After the war that split the world and destroyed all life on Elden, the Kingdoms divided. The Silver Empire occupied the northern half, while the Republic, defeated and in ruins, sheltered in the southern half. But when evil once again rises and the Silver Empire once again ascends to power, both nations are forced to unite. ■ **Characters:** • **Rise** A lady with a strong sense of duty and courage, a woman who yearns for justice to restore the world. She is tasked with rebuilding the Republic, thus embarking on her journey. • **Tarnished** A hermit of the woods, a man who strives for love. He seeks to destroy the evils that seek to destroy the world. • **And the others:** Since the story is one of hope and pain, the struggle to restore the world never ends, but new adventurers come in to find new ways. This is the story of you. ■ **Kingdoms** Depending on the character you play as, you will begin at a certain point in the two Kingdoms. **Silver Empire** The Silver Empire is the northern half of the Elden world, and you will begin the story by accepting the request of Calamity. The Empire consists of a large number of cities and towns, and the residents are nearly all nobility. The Empire borders on the sea, and travels and trade are popular, and thus the cities and towns are bustling. The Empire also has a high standard of living, due to its rich farmland. **Republic** The Republic is the southern half of the Elden world, and you will begin the story by accepting the request of Calamity. The Republic is built in a sprawling forest, and people tend to live outside of towns. Due to its remoteness and poverty, a number of festivals occur. As for a living, local animals and blacksmiths are the main sources of livelihood. ■ **Scenario:** A grand story of glimmering light and thorns and twists. As you fight the evil that tries to reclaim the land, a broken world is restored in the process. \* Character may not match the name exactly. We will be monitoring any cheats and scams at all times. I also want it to have fully voiced characters in the dialogue, graphics with a good atmosphere, online play with customizable characters to form a party, and at least multiplayer. **RECOMMENDATIONS:** The game has excellent graphics, good music, and all in all a good game in my opinion. One reason why I think it is good is because it has many options for customization. I like that it has a lot of things to do, such as collect medals, duel, and explore parts of the game. I also like that you can customize your character, such as change the gender, change your voice, change your appearance, and create your own companions. I think this game is a good representation of the type of games that I like. The game has great music and an epic story, but only 2D graphics and 2D sound effects. It is a good story and it is an RPG. I don't think the graphics look bad at all. I think they look pretty good for this type of game. The story is really good, as well as bff6bb2d33

**Burn the game to a.iso image and install 5. Play the game What is a really good game? I always thought it's, according to me, when I play it, it's really enjoyable. I believe most of us agree about that. So what if I told you there is a really good game which still lacks a lot of popularity. It's still a good game but there is not much hype around it. It's not a difficult game, no crazy story, no intense action, no spell, no special skills, no extra characters. It's just a good game and a fun one. The game is based on a one piece manga series and it's written by a SEGA fan. The game is called ELDEN RING. It uses a really simple combat system, where you can perform normal attacks, magic attacks and a 3rd one, a mega attack. There are 10 classes in total, but the only one that is worth playing at first is the warrior because it has all the other attacks as its class specific attack and one for each attack does more damage and is available earlier in the game. A wizard also makes a good choice at first because you can perform many different kinds of magic and once the game is past the halfway point, you will be faced with many bosses, which will make you want to use a weapon. The weapon control is done by performing a step function on the analog stick. At first, the step is small, then it will get bigger, and then it will get bigger again. There is also a button that lets you perform a strong attack, but you shouldn't waste it on a normal boss. It will make you defeat them in just a few hits. Normal enemies will be defeated with the same strategy and attack. I have played the game, beaten the first mission and it's still fun! The game has a visual novel where you watch animation videos when you talk to NPCs. You will get to know their personality and sometimes you will be able to ask a favour or a question. Like a dating game, it's all very nice. You can choose to read or not and in between, you will get to watch a brief animation video. There are a lot of funny animation videos and they are a nice touch to the game. Although I do recommend reading some of them first. You can change your mission of the character if**
