The full version of the.Q: Easiest way to make a RIA server and client compatible I am working on a project and I need to interact with a server that is based on RIA Services. Right now, the server is a Silverlight application and I need to move it to a WPF desktop application. The fact that my server is based on RIA Services will probably require me to rewrite some part of my application, but I am not sure yet whether this is the way to go. I don't want to get into the trouble of writing RIA code from scratch in WPF.
