Open Autodesk Acalc Enter the following: Enter the license code of your Autodesk Autocad Serial Number. Select "connect" and continue. Select "Connect" and follow the next steps. Select "Autodesk Autocad" and select continue. I have seen a number of replies that claim you can enter the license into the "Connect" menu without the key, but that's not correct. Even if you enter a license number you still need to enter the key. The key is something that AutoCAD tells you about as part of the license, and if you are trying to get a free trial you need the key to get that trial. You can make sure you have the right key by going into the run menu and running "AutoCAD". The interface will pop up, asking for your key, and it should say "AutoCAD is currently licensed to , key ". Don't enter any key here as you don't have a license. You just need to enter your key. Q: Get public IP address on AWS EC2 server I am running an Amazon EC2 server.
