The exceptions include: Places where all updates are downloaded, where you cannot save downloads directly to disk. For example: Windows Update, which never downloads to disk, except when it does. File associations. Some programs have folders associated with them, and if you save a file to one of those folders. Without the associated program it will not show up in the Save as dialog. Note that the file associations are only a Windows feature. If you are running Linux, I am not aware of any program that causes this. (But it would be worth looking for.) Q: If arr is read-only, what would be the most idiomatic way of making a copy of that array? If I want a copy of an array literal that was read-only, what would be the most idiomatic way of creating a copy of it? Right now, I'd say: let newArr = arr.slice(); Is there a more idiomatic way? A: slice() is the idiomatic way That being said, if you wanted to copy it yourself, you can do it much more elegantly: const
