
Hamster Heroes FULL VERSION NEW Extra Quality

Hamsters may seem like cute little pests to you, but believe us -- they're a real pain. They carry diseases you've never heard of. And if their population increases unchecked, their calls will sound like a nightmarish cacophony. We're talking about Armageddon. Don't expect to hear more from the hamster if we're successful. It will be swept up and recorded for posterity. Unless, of course, you get it on tape. The scientists at Horizon Lunar Colony were very clear about the importance of documentation for this project. If you find yourself engaged in an unnatural battle with a hamster hero, you're doing it wrong. The SRL is the thing. But they're an animal, right? They can't speak. They can't even tell you their names. So how do you know they'll go to all this trouble? When a scientist comes up to a cage of hamsters with a Petri dish of fresh hamster food and says, "Hamster heroes, I have an announcement," you know the hamster is up to something. The hamster hero news mightn't be quite as surprising as the news that Hammond isn't a chimp. While it's common for Blizzard to keep secrets about heroes for months at a time, it's been an issue ever since Symmetra's reveal. Even so, Hammond's story feels more complete than most of the characters who came before him, as much as we might like it to be. The hero trailer kind of misses the point, and a month later, there's still no in-game reveal, but the limited-time Symmetra skin is on sale, and we can try playing Hammond in Competitive mode... If you want to put Hammond's big teeth and buckly hair to the test, you can already buy a Symmetra skin with his hamster-inspired face, and also try his first-person view ability, as well as his new toys -- the Meat Hook and Street Sweeper. You may not be able to go hamster-tastic with Hammond at the moment, but you can always flash that skin to show off your hamster hero pride later on.

Hamster Heroes FULL VERSION NEW

Many players have asked on various forums how they can help their own make it in Hamster Heroes.

We'd also like to share a helpful tip we received from our Facebook page regarding success in Hamster Heroes. "We recommend that players use the Hamsters page in Game Reactor to contact us, as we receive messages there faster than in the official forums. They have a wide variety of hot topics on their board, and the community is focused on helping one another whenever possible." This week is going great; we have now moved into the relatively stable 0.1.0b1 phase of the 0.1.0 update. Building and testing should be coming to a close, although we still have a couple of final bugs to squash before release. We're very excited about testing, and will be posting videos, screenshots, and other things once it's time to start showing off what you see on your screen in this version of Hamster Heroes. If you're new to the game, check out our previous dev posts. Here are some helpful links to follow if you're looking for information on Hamster Heroes, Game Reactor, or Hamster Heroes.
