these methods are essential to the operations and protection of facilities to ensure the safety and wellness of their staff, patients, visitors, and the communities in which they are located. another important part of osh is the work of the occupational safety and health administration (osha) and the national institute for occupational safety and health (niosh). the mission of the osha is to reduce injuries and illnesses among america's workers by setting and enforcing standards, enforcing compliance with those standards, and providing training. the most common form of osha is the osha inspection. osha carries out inspections in response to complaints or based on suspicion of a violation. osha has a procedure for conducting investigations that includes an initial complaint, a pre-complaint notice, and a compliance-determination notice. the steps in the process of an osha inspection are listed in table 7.2 of ansi/ashrae/ashe standard 170. this standard gives a detailed description of the required procedures for an osha inspection. the occupational safety and health administration (osha) is one of the oldest federal agencies in existence. as part of its mission, osha is

responsible for reducing workplace injuries and illnesses and creating a safe and healthful workplace by setting and enforcing standards, enforcing compliance with those standards, and providing training. osha has its roots in the late 19th century, when it was established as a response to industrial injuries and deaths. today, osha provides resources to help businesses protect workers from hazards. 5ec8ef588b
