I believe it is very useful for people who lost their passwords. It will generate a new password and give you the option to change the password. The interface is pretty simple and easy to navigate through. All the features work as advertised and and this program is absolutely free to use. The only downside is that the program is only compatible with Windows XP, but that's a small price to pay for an amazing program. This is an excellent program and I would highly recommend it to anyone who is looking for an effective means of resetting forgotten passwords without having to reboot their computer. Great program. Well done.

Thanks!
