the software is an engineering design and engineering productivity solution that integrates several aspen applications allowing the following projects to be designed, modeled, and optimized (e.g., power plants, chemical plants, or any complex process): (1) aspen hysys, (2) aspen vario, (3) aspen process solutions, (4) aspen hysys companion, (5) aspen hysys master. our simulation software allows the user to visualize the entire process in hysys. the user selects which aspects of the process they would like to model and then drag-and-drops the components onto the worksheet. hysys allows the user to change and optimize some of the variables that are important to the process and to see the results of the changes instantly. hysys is a steady-state hysys system. the program is designed to be used in a simulation environment and/or as a stand-alone program. aspen hysys is an ideal software for cost simulation of a plant. it calculates total costs per process unit and produces numerous cost-simulation graphs from which a line-by-line comparison of different options can be made. an example of an execution of a daily simulation is shown above. a line-by-line comparison of different options can be made from the graphs, and the hysys programme can be used to look at different options quickly. (november 2010) visit our web site at: aspenhysys.com i have tried to install aspen hysys and it is a disaster. the installation is without problems, but when i try to run it i get this error message: "aspen hysys / aspenhysys v6.5.3617_release.exe has stopped working". i can not resolve the problem, please help me on this! i use windows 10 pro, and the support system of aspen technologies give no help. aspen hysys have tried to resolve the problem but it is now solved! thank you.
