This is a big opportunity to now work without mouse, simply by using Photoshop Keyboard shortcuts. To further improve users' experience in editing both images and videos in the browser, new support for popular video and image file types, such as MOV, MP4, WEBM and JPEG, has been added for editing in Adobe Camera Raw. Finally, Photoshop CC users will now have the ability to seamlessly share images across multiple Creative Cloud accounts by adding an account or team to a set of collaborators. This feature lets you share a single set of collaborators, allowing you to share your files with someone using an entirely different Creative Cloud account, without the need to enter your credentials repeatedly. Adobe Creative Cloud desktop and mobile apps, Adobe XD, Adobe Illustrator and Adobe InDesign are currently available in the Mac App Store. Adobe Creative Suite (CS) is available in the Mac App Store.
